## Review: Exilis skin tightening facial at Skin & Body Renewal with before and after pics

**Before**

**After**

So let's talk about skin tightening! As we age, our collagen kind of loses its 'snap'. Much like an old swimming costume with elastic fibres that are now worn out or completely eroded, your face just isn't able to sit nice and 'toit' in the position it once did due to collagen and elastin that's lost its stretch or completely disappeared. The scary thing is that this is something that starts to happen in your late 20s when your body's collagen production slows down dramatically before stopping altogether.
